My Tennis Buddy

"Truly know your Tennis game"

My Tennis Buddy (MTB) puts at your fingertips a powerful tool for monitoring/analyzing match results and understanding better your game. Students, coaches, parents, and tennis fans can compute pertinent match statistics for a given player, analyze the player's strength indicators, and easily view all recorded matches. These features, presented in a simple and intuitive style, give you indispensible insights that will propel you to a whole new level of proficiency in your game.

For iPhone/iPod Touch

Available on the **App Store**

My Tennis Buddy

Match Management:

Tracks match information, including match types (single or double, whether it's friendly, practice, tournament, or league), location and event name. Allows extensive and flexible scoring rules (set, games, various tie-breaks rules). All data is editable, even when match is completed.

There is more to the game than simply hitting the ball. To be successful, a player requires technique, strategy, and good mental and physical conditioning. It's quite difficult to assess these attributes and truly know your game through a single match. Long-term statistical match data is required to extract key indicators, like a player's ability to comeback from the brink of defeat to land a great win (comeback power), a player's ability to conclude a match (finishing power) or to win a tie-break (tie-break success rate). MTB highlights this invaluable information so that you can readily identify weaknesses and make the corrective actions that will spawn major breakthroughs in your game.

Player Management:

Captures player's profile (name, ranking, stroke types). Offer player's category (favorites or opponents) for accelerated player selection. Player screen gives you a detailed summary of all matches for a given player, head-to-head with an opponent, and overall match statistics. This will help you identify how you fare against your opponents.

Match Statistics:

Highlights match statistics in a simple and intuitive style. Outlined match statistics summary (wins/losses, tie-break success rate, "bagels," breakdown singles vs. doubles) and winning trend information (winning streak, and last few matches).
